1. About The Event

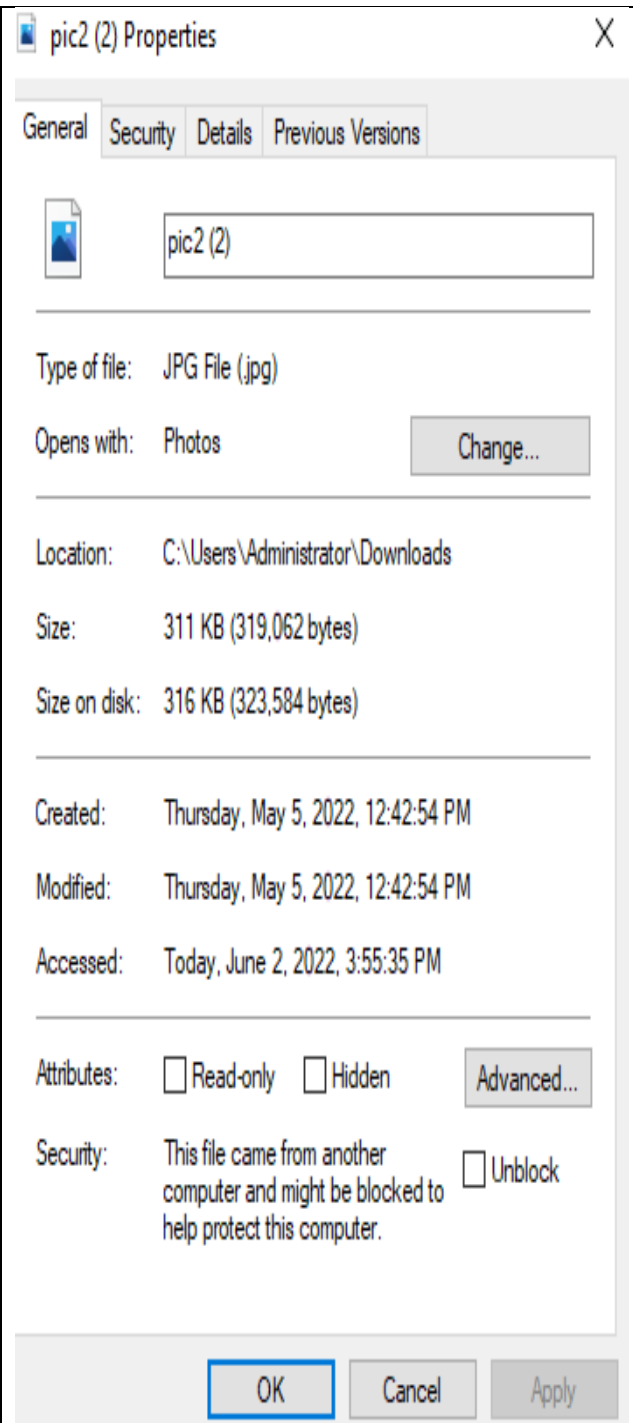

- The event was conducted on 05.05.2022 starting from 9.20AM to 11.20AM.
- This event was conducted exclusively for first year students in order to develop the programming skill of the students in C++.
- The constraint given for the event is that they should code only in C++. And within one hour, they need to solve four questions. The one who solves the maximum number of questions by passing maximum test cases will be awarded as the winner
- Coding every day in an online platform (Hackerrank) is a difficult task and nobody will have that intention to learn new programs daily. But if it is conducted in the form of a contest, for sure they will participate to learn more.
- In order to create enthusiasm among the students, we organized this event
- The students will have the opportunity to face new programming problems and increase their thinking capability.
- Nearly 172 students from IT department were participated in this event.
- The main objective of this event is to equip the students with more coding knowledge and improve their skills!

Objectives

- The objective of this competition is to foster learning and growth among students who are passionate about programming through healthy competition and knowledge sharing.
